

U.S.SAWS™

U.S.SAWS Ultra Vac 1250

U.S.SAWS Ultra-Vac 1250 dust collection system is a lightweight, durable, and easy-to-use industrial vacuum system. This vacuum can handle any surface preparation cleanup projects, small or large. This system is OSHA certified and under table 1 regulations.

Equipped with a large HEPA filter, the Ultra-Vac 1250 will withstand full loads of dust while never jeopardizing suction power. Along with that, this dust collection system is also able to work well with gas-powered equipment necessary for other surface preparation projects such as masonry and block saw equipment.

Features:

- Durable steel frame with polyethylene body built tough for wear & tear on the construction site
- (2) 120V motors with individual switches and HEPA filters
- 2"x25' crush proof hose included
- Dust bin has 12.5-gallon dust capacity
- Dust bin is trash bag friendly and is easy to empty
- Can be used with the U.S.SAWS' Bagger Frame
- Manual filter cleaning
- Front & rear handles for easy transportation up & down-stairs and in & out of vehicles

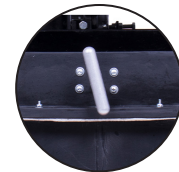

220 CFM Dust Port
